Canada

Re: Letter of Reference

To Whom it May Concern ,

We have had the pleasure with working with Aquantum Consulting & Design as our sub consultant for pool and pool equipment design over the last 15 years on a number of recreational and municipal projects.

Most recently, Aquantum designed the Jaycees Recreational Pool upgrades in St. Thomas, Ontario and the City of London Southcrest Pool Project. Both projects involved all equipment replacement inside and outside. Southcrest which was the larger project also incorporated the design of a zero beach entry component.

Roger Bacci of Aquantum was invaluable in providing his empirical knowledge, past expertisences towards selection of the appropriate equipment and pool design. They were diligent in responding to the client's request and needs, translating the required information into drawing and specification format.

There are two items that require special mention. Firstly, Aquantum's budgets at all phases of design and options were highly accurate, which is viewed as very important on a client's and architect's requirements list. Secondly, Aquantum served the client and the design team above and beyond of what was requested of them to ensure that the systems worked as design upon Substantial Performance and deficiencies were completed as designed. They dealt fairly with the contractor and the sub trades, yet held firm on the design and implementation of the design, which is particularly important these days working with inexperienced trades and low bid project.

We would highly recommend Aquantum Consulting & Design for any project which requires a recreational or municipal pool facility of any size of kind. We would be happy to share our experience directly. Should you have any questions, please do not hesitate to contact me at 519.649.0220 or by email at edv@aLiNKarch.ca.

Sincerely,

Ed J. van der Maarel
